3. TRIGGERS `TR`

You have the option of informing your network about employment changes, educational changes, work anniversaries, and profile video updates. Enabling profile update notifications may result in a post in your network's feed, an in-app notification, or an email notification.

10. YOUR SOLUTION `SL`

To create an end-to-end web application that can present current job openings based on the user's skill set. The database stores the user and their information. When there is an opening that matches the user's skill set, an alert is delivered. Users will communicate with the chat bot, and recommendations will be made depending on their talents. To acquire the most recent job vacancies in the market, we can utilize a job search API that pulls data directly from the website.

8. CHANNELS of BEHAVIOUR `CH`

Enter a place (postal code, city, state, province, or country) in the location section at the top of your screen to narrow down your job search. Your job search results will show results from any time period by default,   but you may also opt to display jobs posted within the last 24 hours, week, or month.
